Professional Summary

Senior Frontend Engineer specializing in enterprise **ERP, FinTech, and analytics platforms** across LegalTech, GovTech, and Tourism. **Expert in Angular (v8–22)** with production backend experience in **Node.js (NestJS, Express)**; proficient in React/Next.js. Main engineer on a five-product SaaS suite and on a cloud accounting ERP, with deep strength in **financial systems** (journal entries, approvals, tax, invoicing, audit trails), **configuration-driven architecture**, and **data visualization**. Builds bilingual Arabic/English products with RTL designed in from day one. Case studies with screenshots and live links: abdulrhmansamir3579.github.io.

Technical Skills

Expert: Angular (v8–22: Signals, NgRx, RxJS, SSR, zoneless + OnPush), TypeScript, Nx monorepos, SCSS architecture

Backend (production): Node.js — NestJS, Express; REST APIs, WebSockets, Server-Sent Events, Prisma, Redis + BullMQ

Proficient: React, Next.js (SSR/SSG, static export), next-intl, TanStack Query, Tailwind CSS

Domain: ERP & financial systems (double-entry accounting, journal entries, multi-stage approvals, tax & e-invoicing, purchasing, payroll, audit trails), data visualization (Chart.js, ECharts, Recharts), LegalTech/compliance, GovTech

Data & Integrations: PostgreSQL, Redis; payments (Stripe, Paymob); JWT auth; Google Maps, OpenStreetMap

Testing & Delivery: Vitest, Jest, Playwright; GitHub Actions, Docker

Performance & Discoverability: code splitting, lazy loading, Lighthouse & axe accessibility audits, SEO & generative-engine optimization (GEO/AEO)

AI-Assisted Engineering: Claude Code, Cursor

Working Knowledge: .NET Core (Entity Framework)

Professional Experience

Expanders 360 | Case study · Comply360 live · 360 suite — Jan. 2026 – Present

Senior Frontend Engineer — *Egypt*

- Main engineer on the suite's **Angular 22 Nx monorepo** — **Comply360** (core product), Expand360, Signals360, Masar, Belvro — with about two-thirds of the commits on main; review and merge the team's pull requests
- Upgraded the workspace to Angular 22 and TypeScript 6, made all seven apps **zoneless with OnPush**, and reorganized it into product-scoped libraries enforced by Nx tags
- Built the shared **configuration-driven flow engine** — a contract-driven question runner with repeaters, record pickers, document uploads, and server-owned progress — powering Comply360's incorporation and compliance journeys, plus the component, template, and Signal Forms infrastructure every app uses
- Built Comply360's client and admin apps: OTP sign-in, onboarding, the compliance workspace (licences, document vault, obligations, compliance calendar), backend-driven access control, and real-time notifications over **Server-Sent Events**
- Shipped **Stripe billing**: versioned plan catalog, checkout with trials, prorated upgrades, scheduled downgrades, and invoices
- Built and deployed the bilingual **360 ecosystem site** solo with SEO and generative-engine optimization (JSON-LD, hreflang, llms.txt); set up per-app deploy pipelines, a staging environment, and a Playwright end-to-end harness

NEXT & Associates | Case studies: Film SA & Red Sea · DAEM & Hwadi — Aug. 2024 – Dec. 2025

Senior Frontend Engineer — *Cairo, Egypt*

- Lead contributor on the **Film SA cash-rebate admin**, built from an empty repository: a permission-driven workflow that takes each production-incentive application from review and scoring through awarding, disbursement documents, and payout
- Built Film SA's application review across ∼15 sections, the cash-rebate evaluation with local and international scoring, and the line-by-line rebate evaluation of expenses, payroll, and wages
- Built the **DAEM** platform's Entertainment sector module, financial benchmarking and analysis, and financial-statement extractor, plus the **DAEM – Qiyas** AI compliance platform for Saudi Arabia's Human Resources Development Fund
- Built the **Hwadi** executive strategy dashboard alone — chairman, CEO, CFO, and PMO views — on a reusable Chart.js **data visualization** engine I wrote
- Also delivered interfaces for Red Sea Global, Momah, Saudi WC, and DT Requirements

ETOLV | Case study — Oct. 2022 – Aug. 2024

Frontend Developer → Senior Frontend Developer — *Giza, Egypt*

- Built much of a **Tourism ERP**'s reservations engine for MENA travel agencies: bookings and ticket workflows, refunds and voids, Umrah, hotel pricing, transportation, and incoming-tourism modules
- Built the accounting app's **invoicing** (credit/debit notes, per-line VAT), **tax-authority e-invoicing and POS e-receipts**, and the supplier-payment workflow with VAT and withholding tax
- Reworked the trial balance, rewrote profit and loss, and added financial-year closure, treasury reports, and a cash-count module
- Moved modules from the Angular 8 portal to the new portal and added a shared cache for ∼25 reference datasets; Arabic/English throughout with RTL prints; promoted to senior

Selected Projects — full case studies at abdulrhmansamir3579.github.io

ePath — SkyApps Cloud Accounting ERP | *Angular 21, NgRx, ECharts* | Live demo · Case study *Dec. 2025 – Present*

- Main frontend engineer (∼75% of commits) on a bilingual ERP rebuild: double-entry finance core, full journal lifecycle with approvals and bulk posting, a **tax engine** with returns, and purchasing from RFQ to 3-way-matched bills
- Designed ∼47 shared components and **line-level audit history** with revision replay; set the CRUD page standard applied to ∼80 screens, on 64 NgRx feature slices and ∼4,100 Arabic/English translation keys

SkyApps Website | *Next.js 16, React 19, next-intl, Tailwind CSS* | Website · Case study *Sep. 2026 – Present*

- Sole developer: Arabic-first 11-page marketing site from Figma to indexed production in about six weeks, using the CRM as a headless CMS and serverless lead capture
- Lighthouse **100** for accessibility, best practices, and SEO (99 desktop performance); JSON-LD, hreflang, Consent Mode, and pixel-diff visual regression against Figma

Leen — Tutoring-Center SaaS | *NestJS 11, Prisma, PostgreSQL, BullMQ, Next.js* | Case study *Oct. 2026 – Present*

- Founder and sole engineer of my own multi-tenant SaaS product: **NestJS API** with 57 Prisma models, 20+ granular permissions shared by API and UI, subscription plans, and a super-admin console
- Scheduling engine with conflict detection, center finance (payment allocation, receipts, payroll, P&L), offline-capable QR attendance, online exams, Paymob payments, and parent notifications over WhatsApp, SMS, and Telegram via BullMQ

Education

Zagazig University Sep. 2016 – Jul. 2021
Bachelor of Engineering (Civil Engineering) *Zagazig, Egypt*
