Abdulrahman Samir

Senior Frontend Engineer — Angular Expert | Node.js/NestJS Backend

abdulrahman.aers@gmail.com | Cairo, Egypt (UTC+2)

linkedin.com/in/abdulrahman-samir-400a401b4 | github.com/AbdulrhmanSamir3579

Professional Summary

Senior Frontend Engineer specializing in enterprise **ERP, FinTech, and analytics platforms** across GovTech, LegalTech, and Tourism. **Expert in Angular (v8–22)** with production backend experience in **Node.js (NestJS, Express)**; proficient in React/Next.js. Owns frontend architecture for a five-product SaaS suite, with deep strength in **financial systems** (accounting, payments, reconciliation, audit), **configuration-driven product architecture**, and **data visualization** at scale. Sustains **100-score Lighthouse** performance and leads a frontend team through architecture, code review, and mentoring.

Technical Skills

Expert: Angular (v8–22: Signals, NgRx, RxJS, SSR), TypeScript, Nx monorepos, SCSS architecture

Backend (production): Node.js — NestJS, Express; REST API design, WebSockets, Prisma ORM

Proficient: React, Next.js (SSR/SSG), Zustand, Redux, Tailwind CSS

Domain: ERP & financial systems (accounting, journal entries, payroll, invoicing, reconciliation, audit trails), data visualization (Chart.js, ECharts, ApexCharts, D3.js), LegalTech/compliance, GovTech

Databases & Caching: PostgreSQL, SQL Server, MongoDB, Redis

Integrations: payment gateways (Stripe, multi-gateway), storage APIs (AWS S3, Google Cloud Storage, Google Drive), Firebase, JWT authentication, Google Maps

Testing & CI/CD: Jasmine, Karma, Cypress, code reviews; GitHub Actions, Docker

Performance & Discoverability: 100 Lighthouse / Core Web Vitals, code splitting, lazy loading, WCAG accessibility, SEO & generative-engine optimization (GEO/AEO)

AI-Assisted Engineering: Claude Code, Cursor

Working Knowledge: .NET Core (Entity Framework), Jenkins

Professional Experience

Expanders 360 Jan. 2026 – Present

Senior Frontend Engineer *Egypt*

- Own the frontend architecture of a **five-product SaaS suite** — **Comply360** (core product), Expand360, Signals360, Masar, Belvro — a single **Angular 22 Nx monorepo** sharing UI, networking, and feature libraries; lead a 2-engineer frontend team
- Drive development of **Comply360**: legal workflow, governance, and case management for law firms and compliance teams
- Architect the suite's **configuration-driven wizard, dynamic-flow, and templating engine** — new multi-step workflows and forms ship through configuration, not code, across every product
- Build **Signals360**, the suite's analytics product: centralized reporting and dashboarding on a themeable, scalable **data visualization** architecture
- Establish the shared authentication framework, component library, and form infrastructure consumed by every application
- Sustain **100 Lighthouse scores** across the suite and implement modern discoverability: SEO plus **generative-engine optimization (GEO/AEO)** for AI-powered search

NEXT & Associates Aug. 2024 – Dec. 2025

Senior Frontend Engineer *Cairo, Egypt*

- Architected frontend infrastructure for **8 AI-powered GovTech platforms** serving Saudi government agencies and Fortune 500 clients
- Delivered design-intensive public platforms including **Film SA** and **Red Sea**, translating complex design systems into pixel-perfect, animation-rich Angular implementations
- Built a high-availability **Node.js file processing service** handling 1GB+ resumable uploads, with a storage-provider abstraction integrating the AWS S3, Google Cloud Storage, and Google Drive APIs
- Standardized analytics dashboards across 8+ high-security platforms with a unified, themeable **data visualization system** (Chart.js, ECharts, ApexCharts)
- Engineered an enterprise component library — authentication, complex data tables, dynamic form builders — cutting project delivery time by 50%
- Reduced API traffic by 60% with an NgRx caching architecture while sustaining 95–100 Lighthouse scores on portals serving thousands of concurrent users

ETOLV Company Oct. 2022 – Aug. 2024

Frontend Developer → Senior Frontend Developer *Giza, Egypt*

- Architected a **Tourism ERP** platform for travel agencies across MENA, integrating accounting, CRM, CMS, and Hajj/Umrah booking workflows that handle thousands of pilgrims annually
- Built the ERP's **financial core**: multi-gateway payment integration, automated invoicing, real-time reconciliation, and audit trails for regulatory compliance

- Designed an HR system from the ground up: complex **payroll calculation**, attendance tracking, and compliance reporting for a 500+ employee organization
- Led an 18-month **Angular v8 → v19 migration**, rebuilding 50+ components with performance-first architecture — 60% faster response times
- Automated localization across 8 languages with a Python + Google Translate pipeline, eliminating 80% of manual translation work; promoted to senior, mentoring 2 engineers

Selected Engineering Projects

ePath — Financial Accounting Platform (SkyApps) | *Angular 21, TypeScript*
- Modern rebuild of an accounting ERP frontend: journal-entry management, multi-stage approval workflows, and **line-level audit history** tracking edited, added, and deleted revisions across accounts and partners

Architect System | *NestJS 11, Nx, Prisma 7, PostgreSQL*
- Multi-service backend monorepo with a **multi-database architecture** — an isolated database per service plus a shared settings database — exposed through reusable NestJS data-access libraries

Real-Time Legal Workflow Monitoring | *Node.js, Express, WebSockets, Angular 18, Docker* — GitHub
- Full-stack live analytics dashboard: WebSocket event streaming with anomaly detection and auto-reconnection; Angular Signals frontend with anomaly heatmaps and theming; Docker Compose orchestration

E-Commerce Backend API | *NestJS, Prisma, PostgreSQL*
- Modular NestJS REST API with a Prisma data layer, DTO validation, and layered controller/service architecture

Education

Zagazig University Sep. 2016 – Jul. 2021
Bachelor of Engineering (Civil Engineering) *Zagazig, Egypt*
